**REQUEST FOR QUOTATION
RFQ N° UNFPA/EGY/RFQ/17/006**

Dear Sir/Madam,

UNFPA hereby solicits a quotation for the following service:

**“Localizing the SDGs in Egypt
Data Revolution for sustainable development”**

1. Background:

In 2015, 193 countries including Egypt, adopted the 2030 Agenda for Sustainable Development. 17 goals comprising 169 targets and 232 indicators constitute the core of the Agenda with the overarching objective of leaving No One behind. In 2017, the UN Development Operations Coordination office is supporting UN Country Teams to start-up initiatives that go beyond business-as-usual and have the greatest potential impact. This project is composed of three activities implemented by 3 UN agencies (UNICEF, UNFPA and UNDP) interested in data management under the leadership of the United Nations Resident Coordinator (RC). This call covers one of the activities managed by UNFPA. Products of the interventions will be disseminated broadly to inform policies and leverage partnerships.

Based on CAPMAS declaration and according to available data, Egypt can only report on about 30% on the global indicator list. In the meantime the diverse nature of SDG targets means that setting desirable levels of achievement by 2030 on each indicator requires a variety of approaches. Some targets are explicitly specified in the Agenda itself, either as a fixed value, or as a relative improvement on a country's starting position. In other cases, a fixed value or a relative improvement can be deduced from other international agreements on the relevant topic.

While the SDGs are global, their achievement will depend on Government and its partners' ability to make them a reality in our cities and governorates. Localization is the process of taking into account subnational contexts in setting targets and values to determining the means of implementation to effectively translating the development agenda into results at the local level. This will track the progress on SDGs implementation at the subnational level through accountability and transparency for the wellbeing of all people in a sustainable environment.

A key challenge will be to develop and monitor local targets and indicators for a more contextualized SDGs. A recent study was conducted by OECD titled “Measuring Distance to the SDG Targets” measuring OECD countries starting positions in terms of the distance to be travelled by 2030, and country profiles were developed.

National stakeholders who will be engaged in this exercise are CAPMAS, MoLD, and line ministries related to selected SDGs.

2. Purpose and Objective:

The purpose is to show a model on how to define local targets by setting end-values for SDGs. The aim is to support the ongoing efforts on how to apply an SDG lens to Governorates' work and in mobilizing local and governorates and influence national policy making across the country

The objective of this assignment is to set governorate values vs the national values for indicators under a number of SDGs targets to be presented in a governorate profile. Defining local targets is important to propose strategies for improvement, identify setbacks, measure distance to reach and track progress accordingly.

3. Scope and Description of Work:

Based on the available national/subnational data, seven SDGs are proposed for this professional service, namely goals 2, 3, 4, 5, 8, 16 & 17. Selection of targets, indicators and governors will be done in a participatory manner between stakeholders.

The consultancy firm with UNFPA and National partners will select targets under each of the identified goals.

End-values of the indicators of the selected targets are to be estimated at governorate levels by 2020, 2025 and 2030. Depending on the agreed targets, the number of indicators will not be less than 20 and not more than 30 indicators. The exercise will cover three governorates to be selected in a participatory manner with same stakeholders. Indicators coverage needs to be even across the selected goals.

Different statistical methods can be used to estimate the quantitative values of the different indicators on governorate level. The variation between governorates' across the targets as well as the variation in data coverage need to be taken into account. Also where data did not yet exist for specific indicators, the report can identify proxy indicators and use them instead as interim measure.

4. Expected Deliverables and Indicative Timeframe

	Deliverables	Timeline
1	Design Report: Based on discussion with stakeholders, the report should include: <ul style="list-style-type: none"> - Methodology: proposed statistical model, criteria of selection of indicators and Governorates, source of data - Indicators Framework (Matrix: goals, targets indicators, available national values, Means of Verification) - Proxies indicators in case data did not exist 	Three weeks (mid-October)
2	Final Report (English): Based on the outcome of the exercise the report should show performance and variation of each governorate and how far or close are they toward the selected targets (Number of years it will take to reach the target level on an indicator). Data gaps and issues need to be highlighted as well. Governorate Profile with results is a useful format.	One month (mid-November)
3	Policy Brief (Arabic and English): Based on the final report a policy brief with actionable recommendation targeting Governors and Senior officials at governorate level is required.	One week (Early December)
4	Dissemination: To participate in the high level event that will be organized by UNFPA and sister UN Agencies to disseminate results of relevant activities to policy makers	End December

5. Target Audience

The primary audiences for the deliverables of this assignment will be respective government officials from line ministers including MoLD, Governorates, CAPMAS, MoIIC, MoPMAR, UNFPA, and respective UN Agencies. Localizing the SDGs in Egypt Data Revolution for sustainable development

1. Background:

In 2015, 193 countries including Egypt, adopted the 2030 Agenda for Sustainable Development. 17 goals comprising 169 targets and 232 indicators constitute the core of the Agenda with the overarching objective of leaving No One behind. In 2017, the UN Development Operations Coordination office is supporting UN Country Teams to start-up initiatives that go beyond business-as-usual and have the greatest potential impact. This project is composed of three activities implemented by 3 UN agencies (UNICEF, UNFPA and UNDP) interested in data management under the leadership of the United Nations Resident Coordinator (RC). This call covers one of the activities managed by UNFPA. Products of the interventions will be disseminated broadly to inform policies and leverage partnerships.

Based on CAPMAS declaration and according to available data, Egypt can only report on about 30% on the global indicator list. In the meantime the diverse nature of SDG targets means that setting desirable levels of achievement by 2030 on each indicator requires a variety of approaches. Some targets are explicitly specified in the Agenda itself, either as a fixed value, or as a relative improvement on a country's starting position. In other cases, a fixed value or a relative improvement can be deduced from other international agreements on the relevant topic.

While the SDGs are global, their achievement will depend on Government and its partners' ability to make them a reality in our cities and governorates. Localization is the process of taking into account subnational contexts in setting targets and values to determining the means of implementation to effectively translating the development agenda into results at the local level. This will track the progress on SDGs implementation at the subnational level through accountability and transparency for the wellbeing of all people in a sustainable environment.

A key challenge will be to develop and monitor local targets and indicators for a more contextualized SDGs. A recent study was conducted by OECD titled "Measuring Distance to the SDG Targets" measuring OECD countries starting positions in terms of the distance to be travelled by 2030, and country profiles were developed.

National stakeholders who will be engaged in this exercise are CAPMAS, MoLD, and line ministries related to selected SDGs.

2. Purpose and Objective:

The purpose is to show a model on how to define local targets by setting end-values for SDGs. The aim is to support the ongoing efforts on how to apply an SDG lens to Governorates' work and in mobilizing local and governorates and influence national policy making across the country

The objective of this assignment is to set governorate values vs the national values for indicators under a number of SDGs targets to be presented in a governorate profile. Defining local targets is important to propose strategies for improvement, identify setbacks, measure distance to reach and track progress accordingly.

3. Scope and Description of Work:

Based on the available national/subnational data, seven SDGs are proposed for this professional service, namely goals 2, 3, 4, 5, 8, 16 & 17. Selection of targets, indicators and governors will be done in a participatory manner between stakeholders.

The consultancy firm with UNPFA and National partners will select targets under each of the identified goals.

End-values of the indicators of the selected targets are to be estimated at governorate levels by 2020, 2025 and 2030. Depending on the agreed targets, the number of indicators will not be less than 20 and not more than 30 indicators. The exercise will cover three governorates to be selected in a participatory manner with same stakeholders. Indicators coverage needs to be even across the selected goals.

Different statistical methods can be used to estimate the quantitative values of the different indicators on governorate level. The variation between governorates' across the targets as well as the variation in data coverage need to be taken into account. Also where data did not yet exist for specific indicators, the report can identify proxy indicators and use them instead as interim measure.

4. Expected Deliverables and Indicative Timeframe

	Deliverables	Timeline
1	Design Report: Based on discussion with stakeholders, the report should include: <ul style="list-style-type: none"> - Methodology: proposed statistical model, criteria of selection of indicators and Governorates, source of data - Indicators Framework (Matrix: goals, targets indicators, available national values, Means of Verification) - Proxies indicators in case data did not exist 	Three weeks (mid-October)
2	Final Report (English): Based on the outcome of the exercise the report should show performance and variation of each governorate and how far or close are they toward the selected targets (Number of years it will take to reach the target level on an indicator). Data gaps and issues need to be highlighted as well. Governorate Profile with results is a useful format.	One month (mid-November)
3	Policy Brief (Arabic and English): Based on the final report a policy brief with actionable recommendation targeting Governors and Senior officials at governorate level is required.	One week (Early December)
4	Dissemination: To participate in the high level event that will be organized by UNFPA and sister UN Agencies to disseminate results of relevant activities to policy makers	End December

5. Target Audience

The primary audiences for the deliverables of this assignment will be respective government officials from line ministers including MoLD, Governorates, CAPMAS, MoIIC, MoPMAR, UNFPA, and respective UN Agencies. The synthesis is also expected to be of wide interest among the data community and those interested in the SDGs Follow-up and Review processes.

6. Duration of Contract and Remuneration

It is anticipated that the assignment will kick off the fourth week of September 2017 for a period of three months. Payment of fees will be based on the delivery of outputs, as follows:

- Approval of the design report 30%
- Approval of the final report and Policy brief 70%

7. Management

The consultancy will be managed by UNFPA Country Office. Regular updates will be provided to the RCO and respective UN Agencies. Payment of fees will be conducted by UNDP based on UNFPA clearance.

8. Required Qualifications and Experience

- The service provider should be at least five years' experience in statistical service,
- Well informed on the 2030 Agenda, and can access latest national data, supported by proof indicating that similar project was executed.
- The provider would need to have expertise in synthesis of a large amounts of secondary literature with strong English/Arabic writing and communication skills.

Interested firms should submit a 2-page proposal describing the approach, methodology and timeframe along with a budget proposal no later **than September 19th, 2017**.

Proposal should be submitted to egypt.tenders@unfpa.org with the email subject (**Localizing the SDGs in Egypt Data Revolution for sustainable development**)
