26 August 2024

**Summary for the virtual meeting conducted on 26 August 2024
with potential applicants for community engagement
ToRs in Assiut and Sohag for Noura programme.**

Timeline and targets: The winning bidder will be granted one contract, however, activities implementation will be divided into two phases. Phase one: target 3000, phase two target 8000.

Target community: Our target is, Noura programme parents and family members, wider community including men and boys. There is no specific ratio for the numbers from each target group, this will mainly depend on the proposal your respective company will provide.

Working permits and linkages with families: UNFPA will provide contacts for NCW focal points in the governorates if needed who can accordingly advise or facilitate the reach during implementation, however, applicant company should have its own methods of reach to the wider community and beyond Noura programme families.

Financial proposal: financial proposal should thoroughly reflect all activities mentioned in the technical offer including all logistical arrangements: ex: accommodation if needed in any camp/ transportation/ giveaways and so on.

Cost of activities: implementation should happen inside villages, however, if there is a solid rationale for some activities to be outside, this will be also possible if the reasoning is clear. Being innovative in selecting activities doesn't mean going for costly ones. Interventions can be simple with reasonable cost and good impact.

Ceiling of budget: this information cannot be revealed as it's a competitive process.

Note: Companies are free to submit two offers one in Assuit and one in Sohag, offers should be separate, however, only one company will be selected in each governorate.

Deadline for submitting quotation: for both tenders # UNFPA/EGY/RFQ/24/023 and UNFPA/EGY/RFQ/24/024 extended till 7th September
