

TERMS OF REFERENCE FOR INDIVIDUAL CONSULTANT

TERMS OF REFERENCE (to be completed by Hiring Office)	
Hiring Office:	UNFPA Egypt Country Office
Purpose of consultancy:	The purpose of this consultancy is to develop a mechanism for enhancing the role of women health clubs (WHCs) and develop a tool for monitoring the women reached via WHCs.
Background	<p>UNFPA in its 10th cycle aims to strengthen the capacities of line ministries and civil society for the provision of high quality, integrated and rights-based reproductive health (RH) and family planning (FP) services. UNFPA is also focusing on increasing the demand for informed and voluntary FP products and services for women and men of reproductive age.</p> <p>This will be achieved by addressing norms and social determinants of RH and building national capacities for integration of community workers into the primary health care system to promote use of FP and RH services.</p> <p>One of the activities to achieve this is to revitalize Ministry of Health and Population (MOHP) women health clubs (WHC), which are located at FP clinics. This is one of the non-traditional interventions in the field of raising the health awareness of Egyptian rural women in Egypt's various villages, particularly awareness related to RH and FP.</p> <p>These clubs were equipped with necessary means to use them during the awareness raising (based on a needs assessment carried out in 2018) and the awareness activities were linked with other available programs such as small loans-giving banks, handicrafts exhibitions, and illiteracy classes. Until today, UNFPA supported the procurement of needed assets and equipment for 33 WHCs in Assiut, Luxor, Alexandria, Menoufeya, Fayoum, and Beni Swef.</p> <p>Based on the achievements of last year, it is suggested to recruit a national consultant to build on the work achieved, suggest additional interventions for development by expanding partnership, as well as develop a system that will allow the MOHP to effectively monitor the activities of the WHCs for an enhanced results based programing.</p>
